

ElectricSuper has 4 pre-mixed investment options, designed to deliver different returns at different levels of risk.

The Strategic Asset Allocation of each investment option states the percentage that will be invested in different types of investment classes (such as shares, property, bonds, etc) to achieve the targets of the investment option. ElectricSuper regularly reviews the Strategic Asset Allocations to keep investment options on target.

The Strategic Asset Allocation is being changed for the *Conservative Growth* option.

What is changing?

The Strategic Asset Allocation of the Conservative Growth option was changed at the December ElectricSuper Board Meeting to:

- reduce Defensive Alternatives from 20% to 14%
- reduce Cash from 20% to 15%
- increase Bonds from 17% to 28%

The changes are being made to allow ElectricSuper to be better positioned to take up other investment opportunities as they arise.

The new allocation for the Conservative Growth Investment Option is:

Australian Shares 10.0%

Overseas Shares 12.0%

Property 10.0%

Alternatives 25.0%

Fixed Interest 28.0%

Cash 15.0%
